Readers' Opinion

“The GENTLE MEDICINE book has arrived safely today. – This morning’s timetable is disrupted, your book is addictive and I cannot put it down. ... This is a wonderful book.”

– Francis Treuherz, internationally well-known homeopath,
UK

“GENTLE MEDICINE is, I think, the ‘bible’ of medicine, comprehensive, competent, fascinating and capturing the roots of health and illness down to the last detail. It is not only unique in content, but also precious.”

– Peter Steffen, editor-in-chief, Austria

“GENTLE MEDICINE is excitingly written and contains a wealth of valuable information from which even the experienced homeopathic doctor can still learn. The examples show that most chronic diseases are caused by suppression and vaccination damage and that a properly applied homeopathy can often still help even in seemingly hopeless cases.”

– Dr. Karl-Heinz Gebhardt, German Central Association of Homeopathic Physicians

“This book should be widely distributed, because the topics it deals with and the proposed solutions are especially needed in our time.”

– Anita Petek, editor-in-chief, AEGIS Impuls, Switzerland

“A new dimension in medicine! The book of Dr. Grätz is a guide to a future of gentle medicine. It should be compulsory reading for every medical student and every practicing doctor.”

– Anne Devillard, editor-in-chief, Natur & Heilen, Munich

“Seldom have the real mechanisms of illness and healing processes become so clear to me as in this book. GENTLE MEDICINE should become a standard work. The time has come for a paradigm shift in medicine.”

– Lars-Ulrich S., freelance journalist, Berlin
